SUMMARY

MLOps & DevSecOps Engineer with 6+ years of experience building and automating cloud infrastructure, CI/CD pipelines, and production ML platforms across **AWS, Azure, and GCP**. Skilled in **Kubernetes, Terraform, MLflow, GitHub Actions, DevSecOps, and GenAI/LLM deployments**, with proven impact reducing **release cycles by 30%** and **MTTR by 40%**.

PROFESSIONAL EXPERIENCE

MLOps & DevOps Engineer | Unitech Solution LLC (Client: Wells Fargo) | USA

Jul 2025 – Present

- Deployed and operated **15+ containerized services** on **AWS ECS**, using **Kubernetes HPA** and **AWS Auto Scaling** to maintain application responsiveness during traffic spikes; administered underlying **Linux** hosts.
- Provisioned and managed **20+ AWS resources** across **EC2, S3, and IAM** using reusable **Terraform modules**, improving infrastructure consistency across development and production environments.
- Built **GitHub Actions CI/CD pipelines** with **SonarQube** static analysis and security gates, automating application and **ML model releases** and reducing manual deployment steps by **60%**.
- Automated **MLflow-based model packaging and versioned releases** for a **Google Gemini-powered GenAI service**, adding post-deployment **drift and latency monitoring** to support reliable production releases.

Senior Application Development Engineer (DevSecOps) | Accenture (Client: UBS) | India

Feb 2019 – Jul 2023

- Provisioned and standardized **Google Cloud Platform (GCP)** infrastructure using **Terraform**, supporting **ML training and deployment workloads** across repeatable environments and reducing configuration drift.
- Implemented **MLflow-based monitoring** to track production model and service performance, identifying degradation patterns and triggering intervention workflows for **ML workloads**.
- Orchestrated **containerized workloads on AKS** with **Kubernetes network policies, Azure AD RBAC, and Azure Key Vault** for TLS certificates and secrets rotation across **15+ teams**.
- Designed and optimized **CI/CD pipelines** using **Azure DevOps and GitHub Actions**, integrating automated provisioning and release workflows to reduce **release cycle time by 30%**.
- Embedded **DevSecOps controls** including **Azure Policy, SAST, and compliance scanning** into CI/CD pipelines to support **SOX, MiFID II, and Basel III** requirements.
- Automated **incident-response runbooks** and configured **Azure Monitor and Log Analytics** for SLA-breach alerting and disaster-recovery readiness, reducing **MTTR by 40%**; received **APEX (2022)** and **ACE (2021)** awards.

Junior Software Developer | Global Industria | India

Jun 2018 – Feb 2019

- Developed a **multilingual invoicing service** using **Spring Boot** and re-architected **cart and checkout workflows**, increasing checkout conversion by **15%**.
- Improved checkout validation, error handling, and transaction workflows, reducing **customer support tickets by 30%** and improving overall purchasing reliability.

TECHNICAL SKILLS

- Cloud:** AWS (EC2, ECS, EKS, Lambda, S3, RDS, IAM, VPC, CloudWatch, Route 53), Azure (AKS, App Services, Key Vault, Monitor, Log Analytics), GCP
- DevOps & CI/CD:** Terraform, Ansible, CloudFormation, GitHub Actions, Azure DevOps, Jenkins, Argo CD, SonarQube
- Containers & Kubernetes:** Docker, Kubernetes, EKS, AKS, ECS, Helm, HPA, Network Policies, CronJobs
- Observability:** Prometheus, Grafana, CloudWatch, Azure Monitor, Log Analytics, Splunk, MLflow
- Security & Compliance:** IAM, RBAC, HashiCorp Vault, Azure Key Vault, TLS, Secrets Management, SAST, SOX, MiFID II, Basel III
- Programming & Data:** Python, TypeScript, Node.js, Bash, PowerShell, Java, Spring Boot, C#/.NET, SQL, PostgreSQL, Redis, Kafka
- MLOps & GenAI:** MLflow, Model Registry, ML Pipeline Automation, Drift Monitoring, LLM Integration, Google Gemini, Prompt Engineering
- Certifications:** Microsoft Azure Fundamentals (AZ-900) | Azure Developer Associate (AZ-204) — In Progress

EDUCATION

Roosevelt University | USA

Aug 2023 – May 2025

Master of Science in Computer Science

University of Mumbai | India

Aug 2014 – May 2018

Bachelor of Engineering in Information Technology

PROJECTS

Real-Time Telemetry Pipeline

- Engineered a **real-time, event-driven telemetry platform** with **Node.js, TypeScript, and queue-based ingestion**, using **Terraform** for infrastructure provisioning and centralized logging to support reliable processing of high-volume device and robot telemetry.

Bitcoin Price Tracker

- Automated **real-time Bitcoin price ingestion** with a **Kubernetes CronJob** running every **15 minutes**, capturing **2,500+ weekly data points** with containerized scheduling and automated data collection.
