

Asmita Arun Kolte | Cloud Engineer

Chicago,IL| +1(219)-466-6258 | asmitaakolte97@gmail.com | [LinkedIn](#) | <https://asmitaakolte.github.io/portfolio>

SUMMARY

Experienced Cloud & DevOps Engineer with 5+ years in **Azure, IaC (Terraform, ARM), and scripting (Python, PowerShell)** for financial systems. **Led secure, scalable AKS platforms and CI/CD pipelines**, enabling faster delivery and audit-ready compliance in banking workflow compliance with **MiFID II/Basel III, and policy-driven access controls**. **Trusted SME and collaborator** across cross-functional teams, known for **driving automation, observability**, and resilient cloud solutions.

PROFESSIONAL EXPERIENCE

ParetoLabs, Chicago | MLOps Engineer Feb 2026 - Current

- Deployed **Claude inference pipelines on AWS ECS** for automated summarization and product comparison, boosting insight generation speed by 65%.
- Implemented **Kubernetes HPA & AWS Auto Scaling** for reliability during **inference and crawling spikes**.
- Monitored ML models on **AWS (EKS, CloudWatch) for drift, latency & degradation**, cutting setup by 80%.

Saayam (Nonprofit) | DevSecOps & MLOps Engineer July 2025 – July 2026

- Built **CI/CD pipelines with SonarQube scanning**, automating builds, tests, and AWS deployments while enforcing code-quality and security gates.
- Designed **MLOps workflows** to automate model packaging, deployment, and monitoring for AI agents.
- Built a full-stack Gemini chatbot with a Python backend, deployed on AWS with S3-managed artifacts and data.

Accenture, India | Cloud DevOps Engineer II June 2021 - July 2023

- Served as **SME for credential management, TLS renewals & secret rotation** via Azure Key Vault & Policy, improved audits.
- Secured **50+ pods on AKS using Kubernetes network policies** and Azure AD RBAC, enabling team isolation.
- Facilitated **weekly syncs with product, infra & compliance teams** to ensure delivery speed & strong cloud security.
- Created **automated runbooks for incident response**, cutting **MTTR by 40%** & ensuring consistent recovery.
- Partnered with AI/ML teams to build LSTM models** on transaction data; deployed on AKS for scalable insights.
- Led cross-functional demos and stakeholder reviews, aligning risk, finance, and technology teams to accelerate solution rollout by two months.

Infrastructure Engineer Nov 2020 - June 2021

- Refactored **batch jobs into Docker microservices on AKS** with MiFID II/Basel III, improved deploy speed by 20%.
- Provisioned infra using Terraform & ARM templates**, standardized Azure deployments, and reduced environment drift.
- Provided on-call support and resolved production issues**, ensuring platform uptime and rapid incident recovery.
- Configured Azure Backup & executed DR drills** to ensure **data resilience and BCM compliance** for analytics workloads.
- Deployed **Azure Monitor, Log Analytics & alerts**, reduced incident resolution time by 60% and improved observability.

Associate Software Developer Feb 2019 - Nov 2020

- Integrated **OAuth 2.0 to secure APIs across services**, strengthening data protection and access control.
- Built data pipelines with Azure Data Factory**, boosting **data accuracy by 22%** and reducing latency.
- Implemented **Redis caching to reduce dashboard load times by 40%**, enabling faster real-time client data insights.
- Developed **Java 11 & Spring Boot 2.x microservices to unify fragmented client data** for wealth management analytics.
- Migrated legacy Java batch jobs, improving I/O and boosting **ETL data load speed by 20%**.

Global Industrial, India | Junior Software Developer June 2018 - Feb 2019

- Built **multilingual invoice PDFs with Spring Boot & frontend templates**, boosting global UX, cutting tickets by 30%.
- Redesigned cart logic full stack, increasing checkout rate 15% via **robust APIs and responsive UI**.
- Developed over **25 JUnit test cases for multiple e-commerce modules**, ensuring code reliability and faster deployments.

SKILLS

Cloud Platforms: Azure (IaaS, PaaS), AWS, GCP
AI/ML & MLOps: Google Gemini, MLflow, ML pipelines, model deployment & monitoring, full-stack GenAI integration
Infrastructure as Code: Bicep, Terraform, ARM Templates, Azure CLI, PowerShell, Bash
Networking & Security: Azure DNS, VPN Gateways, NSGs, Route Tables, Firewalls, Azure Key Vault, IAM, RBAC
CI/CD & DevOps Tools: Azure DevOps, GitHub Actions, Jenkins, Docker, Git, YAML
Scripting & Programming: Python, PowerShell, Bash, Azure CLI, Java
Monitoring & Security: Azure Monitor, Log Analytics, Application Insights, Prometheus, Grafana, Splunk

LEADERSHIP& ACHIEVMENTS

- Directed **enterprise-wide Vault setup across on-prem and cloud servers**, enabling secure credential management for 15+ teams and enhancing org-wide security posture.
- Orchestrated **cloud onboarding by standardizing app registration and access provisioning** across multiple teams.
- Received **Accenture APEX (2022) and ACE (2021)** awards for driving cloud innovation, delivering high-impact solutions, and outstanding client service excellence.

EDUCATION

Master’s in computer science | (GPA: 3.63/4) | Roosevelt University, IL Aug 2023 - May 2025
Bachelor’s in Information Technology | (CGPA: 8.15/10) | University of Mumbai Aug 2014 - May 2018
